

Snapshot

Draw the Rock Cycle, starting w/ the
Igneous rocks!

You have 10 mins!

Igneous Rocks (Notes/Review)

- Cooling & Solidification (Cementation) of Lava or Magma

Extrusive

- outside a volcano (from lava)
- small or no crystals due to fast cooling

Ex. Obsidian Scoria
Pumice Basalt

Intrusive (Plutonic)

- Inside the Earth (from magma)
- large crystals that can be seen in the rocks due to slow cooling

Ex. Granite Gabbro
Diorite
